

Jaeyeong Jeon

Curriculum Vitae

PERSONAL INFORMATION

- Name: Jaeyeong Jeon
- Email: jaeyeong98@yonsei.ac.kr
- Cellphone: 010-3647-1208

EDUCATION

Ph.D. in Statistics and Data Science, Yonsei University March 2024 – Present

- Advisor: Kibok Lee

B.S. in Applied Statistics, Yonsei University March 2021 – February 2024

- GPA: 4.21 / 4.3

PUBLICATIONS

- [3] **DBCM: Dual-Branch Calibration Module for Test-Time Adaptation in Time Series Forecasting** *Under Review*
Jaeyeong Jeon*, Kunwoo Kang*, Sang Yup Lee, Kibok Lee (* equally contributed)
- [2] **Improving Calibration in Test-Time Prompt Tuning for Vision-Language Models via Data-Free Flatness-Aware Prompt Pretraining** *CVPR 2026*
Hyeonseo Jang, Jaeyeong Jeon, Joong-Won Hwang, Kibok Lee
- [1] **Soft Task-Aware Routing of Experts for Equivariant Representation Learning** *NeurIPS 2025*
Jaeyeong Jeon, Hyeonseo Jang, Jy-yong Sohn, Kibok Lee

PROJECTS

AI-Powered Patent Specification Drafting Platform April 2026 – Present

- Built an end-to-end platform that drafts Korean patent specifications directly from raw invention materials (text, drawings, and claims), producing filing-ready documents in standard patent format.
- Designed a multi-agent pipeline that automates the full drafting workflow—from organizing source materials and labeling drawings to structuring claims and writing the specification.
- Implemented a self-reviewing loop in which the system critiques its own drafts against quality criteria and revises them until they pass, reducing manual review effort. services.

Continual Learning for Foundation Models March 2025 – Present

- Funded by Institute of Information & Communication Technology Planning & Evaluation (IITP)

Time Series Forecasting of Passenger Demand March 2025 – December 2025

- Funded by Incheon International Airport Corporation (IIAC)
- Developed a time series forecasting model that replaced a heuristic passenger demand forecasting system and improved holiday-period forecasts by incorporating exogenous calendar variables

Weighted Box Fusion using AutoEval January 2024 – December 2024

- Funded by Electronics and Telecommunications Research Institute (ETRI)
- Developed a weighted box fusion method that leverages AutoEval to obtain per-sample performance estimates for each domain expert and uses these estimates as fusion weights to combine their outputs

EXPERIENCE

Tilda – Research Intern September 2025 – December 2025

- Worked on introducing test-time adaptation (TTA) for time series forecasting and exploring event-aware forecasting approaches leveraging news data

Data Science Lab – President

June 2023 – December 2023

Data Science Academic Club, Yonsei University

- Led a group of 50 members in the academic club as the President
- Organized a grand Homecoming Day event, fostering active networking between alumni and current members
- Acquired multiple industry collaboration projects with companies such as Yanolja and Innovation Forest

TEACHING

Samsung SDS – Teaching Assistant

- Samsung AI Expert: AutoEval for LLM November 2025
- Samsung AI Expert: Multi-Modal Foundation Models November 2024

Yonsei University – Teaching Assistant

- Statistical Machine Learning (Prof. Kibok Lee) Spring 2024
- Computer Vision for Data Science (Prof. Kibok Lee) Fall 2024, Fall 2025

ACADEMIC SERVICE

Conference Reviewer

- CVPR, ECCV, NeurIPS (2026)

SCHOLARSHIP

Y2Y Scholarship

March 2024 – December 2025

Yonsei University

OK Bae & Jung Scholarship

September 2021 – Present

OK Bae & Jung Scholarship Foundation

Guwon Scholarship

September 2023

Guwon Scholarship Foundation

SKILLS

Programming

Pytorch, Python, R, Git, Docker, LaTeX

Languages

Korean (Native), English (Fluent; served as a KATUSA in the U.S. Army)
